

Ronin Beerwinkel

Multidisciplinary Designer & Developer

ronindesignz123@gmail.com (+27) 65 736 5099 Cape Town, South Africa ronindesignz.netlify.app

PROFILE

Designer and developer working across the full creative stack — from building responsive web applications in React to modelling and rendering 3D scenes in Blender and creating digital illustration. I enjoy work at the intersection of engineering and design: interfaces that are as considered visually as they are technically, and visuals built with real craft. Comfortable owning a project from concept through to a polished, production-ready result.

SKILLS & TOOLS

Web Development

React, Vite, Tailwind CSS, Shadcn UI, Three.js, React Router, Node.js, Express.js, Netlify Functions, C++20

3D & Visualisation

Blender, 3D modelling & rendering, product / furniture / architectural visualisation, jewellery design

Design & Illustration

Figma, UI/UX design, digital painting, concept art, character design, perspective & technical drawing

SELECTED PROJECTS

Unified Platform — Engineering & Scientific Workbench

Software

A native C++20 desktop application bringing CFD, finite-element analysis, circuit simulation, DSP and 3D visualisation into one workbench, with a benchmark-validated solver core and real-time, off-thread solving.

C++20 · CMake · Dear ImGui · raylib · ImPlot · Eigen · OpenMP

RoninDesignz Portfolio Platform

Web Development

Full-stack portfolio platform with a React frontend, serverless Netlify Functions backend, authentication, and interactive Three.js visuals — built with atomic-design principles.

React · Vite · Tailwind CSS · Three.js · Node.js · Express.js

Redbull 3D Model & Product Renders

3D

Detailed 3D product model and animation with realistic materials and lighting, alongside a body of furniture and architectural visualisation work.

Blender · 3D Modelling · Rendering · Animation

UI/UX Design System & Flows

UI/UX

Complete dark-theme UI design system with responsive layouts, a project gallery interface, and an authentication flow — designed in Figma and implemented in React.

Figma · React · Tailwind CSS

Digital Illustration & Concept Art

2D

A body of digital painting, character and concept work, and technical / perspective drawing studies.

Digital Painting · Concept Art · Character Design
